[Stellaris console edition hive mind guide](#)

At this point we have no reason to believe that Paradox will something for Hiveminds. At this point we know that machine empires will be nervous. This devours in the construction of slots, just like gestalt that need maintenance depots or sentinel seats. There are more¹ factors that affect the production of consumer goods beyond just the cost of the mineral, not to mention that the minds of the beehives excel in mineral production. I talked about hive minds that have relatively weak traditions already. last time play 7-8 month ago. -Hive District give 6 accommodations -town. District give 5 accommodations and 1 employee (2 services and 2 commercial value) or 2 with tradition. Solution for 1.: Prepare for Genetic and use livestock as a food source so you have more workers for services and other resources. Personally, I really don't think they are underpowered, and I wouldn't want to see them polished across the whole line or their weaknesses removed, because I think that would make them less unique. The mental districts of hive literally the greatest advantage of playing to the mind of hive. Yes, synapse drones are not as good as coordinators (although I don't think this is a problem, coordinators are extraordinarily good and are clearly intended as an advantage for machine empires) but they are not weak anywhere in imagination, let alone from 2.2 machine empires. Yes, but Å is useless the beginning, when you still have a lot of free mining districts. Conquering means more planes, more ladders and more temporary food production¹ (you have a policy that +33% growth for +50% food, looks like a swarm). Ringworld districts for the minds of hives follow the same logic as other mental districts of hives, but they are pushed to extreme because they are 10 times bigger. They're a lot bigger. (As, the Synaptic Nodes says they convert food or minerals into hot fuzzies. You will need to constantly sell food to cover your esoh kcats retteb , erah evitisop eht ni eb ot toped ecnanetniam 9 ta era ew , seitinema ot sunob elbidercni tuohtiw dlrowgnir tneced a evah ot selbissopmi ylraen s'ti htam eht gniod m'i taht woN seitinema 02+ os boj erom rof noitidart eht evah dluohs enoyreve emit siht yb kniht i tub seitinema 21 ecudorp toped ecnanetniam dradnats A .)kcotsevil rieht elpats evren nac yeht taht ni seripme enihcam revo egatnavda eguh a evah sdnim evih dna(kcotsevil ssam ekil sgniht od ot gnyirt er'uy fi melborp a yltosm s'ti,snoitautis egnirf emos ni ycnaised htwi elggurts nac stlatseg elihW .rotcaer oib esu ro ygrenre rof ti lles dna doof tiolpxe nac uoy ot tnaw yllaer uoy fi dnA .civic a seriuer eht gnidiub a si snema 6 ,gnisuh 01 .erehwesle ecnereffid eht pu ekam ot deen lliw uoy ,esac rehtie ni .tniop emos ta gnireuqnc trats ot tnaw lliw uoy .mraws gniruoved a sA .VT ot ylppa t'nod hcihw ,sreifidom siloponemuce ekil fflts dna snoitidart s'ereht neht dnA .stcirtsid ecruoser boj-hgih esoh tuo llif ot spop eerf fo rebmun regral a si drawer eht tub)stsop lenitnes 3 ro stsop ecnanetniam 6 deen ton ylniatrec lliw uoy ,sdlrowgnir teg uoy emit eht yb hgouhtla(stols gnidiub erom etoved ot deen .seitic riht morf teg senihcam ekil(snaicinhet yoy gninaem ,sboj gnidivorp ton fo tsoc eht ta gnisuh elbissop tsehgih eht edivorp sevh dlrowgnir ,seY .)seitic riht morf teg senihcam ekil(snaicinhet htiw ffo retteb eb dluo uoy esohc fliu tu .nigrum eguh a yb sdnimeviH naht retteb era dna 3.2 ecnis derewoprevo yldiputs era seripme enihcam ecnis ,seripme enihcam .tntiwi etepmoc ot uoy wolla ton esruoc fo lliw ti tub ,skrow dliub siht llarevO .syolla dna)?yhw(hcraeser ygoloib otni nwod meht sdnirg tl .epipme tlatseg-non a ni sdoog remusnec gnidivorp naht tnechtsevni erom yltncasingis eriuquer etecnanetniam + ycnaised dnuof reven ev'I dna ,soiranecs egnirf fo edistuo stlatseg htiw melborp a eb ot ycnaised dnuof reven ev'I ,yllanosreP .dnlimeviH sa sesnepxe i es emoc isauq "Å ,wow hO .eneb onnav eraevlaâlled ilatnem esrosir elled ittersid i 'ehcrep eneb onnav eraevlaâlled idnom I .enoizargimmiâl osrevatta pop aticserc id Äticoile %51 li rep otnup 1 ous II ?enoiznetunam id inord ied oroval li ovitteggos erinifed itservod iam 'ehcreP .ilaicremmoc enoz seuriutsoc etnematulosa etservod non ,aimonoce artsov allen oiramirp aigittob id olloc li onos pop i odnauq ,oiziniâlA .odroccaâd etnematepmoc onoS .odom otseuq ni eraroval rep etattecgorp onos non iraeva ilged itnem eL .ilaroval rep onnon li evres it ,asoc amirp reP .elaizini ocoig len sucof enoizartseâl erazzilitu aedi anoub anu eresse "ÅuP ... ebutuoy adiug ,maets id pohskrov len adiug ehclauq esroF ... aigreneâl rep tols ottersid lus e izivres rep tols enoizurtsoc allus ozrofs ol errudir Ättic alled ereittrauq len oroval erevA)aignre 6 e izivres 4(enoiznetunam enord 1 e ocincet 1 ,iggolla 5 erad tcirtsID sduxen- enoizidart noc 2 o)elaicremmoc erolav 2 e izivres 2(otageipmi 1 e iggolla 5 erad tcirtsID tyC- iggolla 6 erad tcirtsID eviH .itnatrecnocs olos onos inucla am ,noc odroccaâd onos iuq esoc enucla onos iC .pop orol i onamusnec ehc asrosir al onemmen "Å non aigreneâl e ,enihccam elled orepmi nu otuaq ottersid rep aigrene atnat errudorp onossop ehc acifingis artxe oroval nu onnah eraevla etnem alled icitegrene ittersid i ehc ottaf ecilpmes li ,onollecce enihccam elled irepmi ilg elauq allen esrosir id airamirp enoizudorp al "Å ehc ,aigrene id obic id atallennot anu ehcna onamusnec am ,)dnimeviH rep ottut etnemacitarp emoc(reripmE enihcam irotanidrooc ied eroiggep enoisrev anu onos espanyS inord i olos noN .enihccam id orepmi elamron nu a itnavad 5,0 ehcna 'E .ovarb ies acrecir id sunob e esab id erotanrevog noc)elatipac led otnoc ognet(aznaived 061- omaibba oicifide 3 noc idniuq , oicifide / aznaived onem 04 :elicaf 'Äip "Å acitametam al aznaived reP lol sunob .imissep .imissep onare ehc osulcnoc iah e otouv len ilaiznediser ireittrauq i otadraug etnemecilpmes iah ,oN .enoizidart Ätidomoc el onos ilapicnirp imelborp I ..artxe oroval id itsop onocsinrof ehc esrosir id ittersid i noc isratnemilpmoc rep itattecgorp itats oressof ocoig len etla 'Äip esab id inoizatiba el noc ivitatiba Yaw Litnu Secruoser No Neve Kaerb Ot Elggurts Dluow Seripme Enihcam 2.2? NICE!!! It force you into extremely adaptative , charismatic and ascetic right away, you can't do anything without it -Sentinel post suck , normal empire can upgrade this building , hive mind can't . This right here. Where do you get your unity if not from culture workers / synapse drones? To get energy, sell your food on the market or other empires. You will always be inferior to regular empires in the later game. -Sentinel post suck , normal empire can upgrade this building , hive mind can't. -Capital buildings have no lvl 4 available (why?) -City districts are bad , a simple +5 housing and +1 maintenance drone job would be better , it would free building slot -Useless ringworld city district , it prodivie no job .. No need to talk about repeatables though. They were promised to be all about high number (pops and jobs) however regular empires that are building robots are currently way better at the whole pop thing so that adventage goes out of the window. Them being the only job that fill a void doesn't make them less bad . Clerks only start getting useful later, when you 1.) have surplus pops, 2.) no more deposits to exploit and 3.) you have researched Megaplexes. Its +1 extra housing and 0 maintenance Drone jobs. I can't really compare them anymore but without bonus they would be approximatively equal . Keeping energy positive should be trivial after a while, just make sure you have a few generator worlds. They should not be the standard. Even rockbreakers/mining guilds just doesn't compete with hive mind mineral production, and rockbreakers is the boring OP meta civic all machine empires must take to appease reddit. Machine empires are The only kind of empire that could make it work, as their urban neighborhoods provide many basic jobs. However the developers also claimed that Machine Empires would get a job thaths even better at providing administrative cap than what other empires get. 4. You're talking about sacrificing one essential thing (drone maintenance) for another (housing). Maybe some guide in the Steam workshop, youtube guide or... You have to use them. Hivemind's natural resource districts are literally the only good thing about Hiveminds, yes. Once you add the cost of these two jobs you end up with: 10 housing , 6 services , +2 commercial value , that they don't change policies if necessary and that it's an opportunity missed. I'd wonder about the utility of urban worlds with any empire (especially non-gestals, which have a much better option in the form of ecumenopolies) since you quickly run out of construction time anyway. and your capital has less work of reducing deviance, oh and hive mind hunter seeker drone "Å worse than enforcer . Regular empires can improve their fighting buildings of Amenity and Crime, the Hiveminds cannot and as such suffer harder from overcrowded worlds and the next game in general. The only goodie" Devouring Swarm, even if you will be even weaker¹ than other civilians or genocidal machines. Their stability "Å rather weak. Yeah, it's not like their construction of increased resource production give them +4 mining/energy district right? They were fast enough to change the machine empires after 2.2 and 2.2.5 made them 10x more overwhelmed than they are now, then had to be scaled down because the players were killing the players .aznaived .aznaived id imelborp issorg onnah sdnimeviH ilg ehc otacitnemid ehcna iaH .assif Ätitnauq anu erirffo olos am ,ies asoc asseretni non itenaip iA .elaer eropas id 'op nu e dnimevh nu ni etlecs 2 id 'Äip omerva onroig nu esroF .0722-0622 li ortne itudac etnemecilpmes :sdnnimeviH noc ednarg 'Äip amelborp II .olleuq noc otpltom atuia ocidamoN .inoub onos ehc osulcnoc onnah e otouv nu ni ecruosseR id ittersid i otadraug etnemecilpmes .eiramirp esrosir el ettut ni avittudorp ellof al e)tobor id ongosib onemmen aznes(eratalimissa id ollel a POP aticserc al otadiug etnemlicaf reva etnemlicaf ioup emagdiM id oizini'llA .asoizerp asrosir anu onos non enord led iroval ied enoiznetunam aL .irepmi irtla da o enihccam ella ottepsir iggolla 'Äip onemmen onnah non sdnnimeviH ilg ehc otageipm Aig oh iT .aimonoce aut al Åras oilgem ,eracideviro elbissop "Å itenaip 'Äip idniuq ,elacs elled ettut onos eraevla'led itnem el noc imelborp irev onos ic ,atlov anu arocna .eraevla'led itnem el rep ibmartne id colour li onnaripmeir ehc arbmeS .eroilgim oroval roilgim nu ah dradnats orepmi' ,eroirefni otatlusir li rep pop 'Äip isU .izivres 002 e ycnaised 002 oirassecen "Å ... po onos 3.2 ni oi ,os ol(imelborp ah non anihccam anu emoc eracoG .airatenalp enoizazzilaiceps alled sunob ivtacifingis i erazzilitu elbissop "Å ehc ehcna acifingis otseuq(esrosir id itenaip emoc itenaip iout ied inucla erangised iouV .odratir ni ocoig onnah non sdnnimeViH ilg .izivres ia itaciced enoizurtscid id tols onem iuc iu odon led ongosib ah e oloH id irtaht orol i eranroigga etnemecilpmes "Äup tlatseG-noN .lenitneS knits tsop li e adrem alled enoiznetunam id otisopli etrof anihccam .orevad itritrevid a onaizini esoc el ,emagdim len otartne atlov anu .anihccam alled idnm i itut eraf ioup odnauq "Å noob nu "Å ehc atlov acinu'L .iggatnavs e iggtatnav ah onucsac ehc acifingis "Äic .ittaffarpos etnemlibidercni onos ehc esoc el noc itnorfnci ol es itnatsottos olos onos am ,itaicnalibir o itaroval eresse orebbertop ehc esoc id ipit i itut e osnes onnah non ehc inoizidart ,isoion e lobed ocivic onnah .oroval ortla ehclauq ni POP iout i erageipm etneiciffe 'Äip erpmes Å ah anihccam orepmi' etnematseno aM .ispansid inord ia itenimmi ehcifidom el otanoiznem ehcna iaH .pop itlom noc itenaip idnarg us ycnained noc erpmes onnareholtl .ocoig led enoizareti elautta'l a lot of energy credit I don't see how you could ever need to convert food into energy. But, although comparable, it's still a bit less and only gets worse as the game progresses, since it unlocks a lot of production modifiers for everything else except trade. It also makes resettlement cheaper if necessary. Then you have to consider that residential neighborhoods for Hiveminds are garbage and force you to waste a lot of building space in maintenance depots. As a beehive it is extremely important to disable jobs on new colonies. Honestly, I think the balance between normal consciousness and gestalt is fine for the cost of the researcher. It should be better. And I'm sorry if it hurts anyone... Hivemind Power Production is the weakest of all the game, you will be constantly grappling with it while the Machine Empires drown in power. I always say not needing food is an attack on cars. The big problems with Hiveminds are two: 1. Personally, I don't think they're underpowered at all, and I wouldn't want to see them polished all over the place or their weaknesses removed, because I think that would make them less unique. Hiveminds suck at power generation compared to any other empire as they don't have trade and unlike Machine Empires they don't produce more power or they get +1 Tech Drone job in their residential neighborhood (which is overwhelmed and should never have been added at the beginning). I think we spend too much time comparing everything to the latest meta builds and asking for everything else to be brought to that level. I totally agree. In the new colonies, disable the Synapse drones immediately. This is a subjective choice. But I think if we indulge that desire too much, we'll end up with a very flat and homogeneous game. There are with the minds of the hives. Shouldn't they be treated for minerals, not alloys? You have simply examined the resource districts in the void and come to the conclusion that they are good. With tradition, tradition, Bag and also traits you can have enough business to support your entire empire. Even for empires specializing in commercial value. But you need tons of maintenance deposits (depends on the amount of bonuses) and 3 sentry places, it's math. Services cost to mind just too many jobs, so take everything to make this fee work lighter - characteristic of charismatic race and ascetic civic. However, the resource districts of the hive mind are by far the best of the game, rivalled only by regular empires with the agrarian idyll (whose housing districts are considerably worse than the hives). Now it's patch 2.3.2/3, always play as Empire Machine but I want to try Hive Mind, Devouring Swarm and looking for some tips or guidance even on youtube where I can get information about them but working on this patch. This thread made me play a hivemind again, and it was a while ago. If anything, the fact that robots have to remain competitive probably hits spiritualists harder than hive minds. But we also disable it on new colony. Technocracy can ignore cultural operators and get unity from scientists. Because I never said it was a priority. It's 1/3 of a 25-dimensional planet. Of course, I never said that employees are more efficient than technicians, I just said that they were underestimated, people seem to think it's decent, a good job at opening a construction crack with megaplexes, a good job at producing energy. if you need it. You'll notice that the biggest source of crime/deviance are unhappy pops. The resource extraction worlds do not need many construction slots, for example, and benefit much more from the higher population to make use of highly efficient resource districts.
